👤 PROFILE

Mobile and Full-Stack Web Developer with **2+ years** of expertise in the React, React Native, and Node.js ecosystem. Proven track record of leading projects from design phase to deployment, delivering seamless user experiences across both platforms. Passionate about exploring AI-driven applications to enhance product offerings.

📁 PROFESSIONAL EXPERIENCE

Core Engineer 2023 – present | Indore, India
Metafic 🌐

Led and contributed to multiple **mobile and web application** projects using React Native, FastAPI, and modern JavaScript technologies. Successfully led end-to-end mobile app project, building the frontend, backend, admin panel, and integrated an **AI-driven chatbot** using **LangChain**, **ChromaDB**, and **MySQL** with custom embedding and chunking logic.

Mobile Applications:

- **Chef Booking App** (*Australia*): Designed the app architecture, calendar-based booking, and invite functionality for event-based chef services.
- **Insurance App** (*Qatar*): Built multilingual support, implemented object recognition and text extraction, and developed features for managing insurance plans.
- **Social Media App** (*Saudi Arabia*): Integrated AWS IVS for real-time video streaming, built live challenge functionality, and developed user/host flows with Stripe payment integration.

Web projects include:

- **Recruitment Platform**: Integrated resume parsing logic and implemented end-to-end vendor and candidate workflows with multilingual support.
- **Productivity Tracker**: Independently developed an in-house browser extension to track developer productivity.
- **Online School Platform**: Developed web and Android TV apps with live classes and virtual learning features.
- **Air Quality Dashboard**: Led development of the admin panel, mobile app, and backend to manage sensor data, station visibility, and customer access.

Also engineered a static website and a competition platform, overseeing both frontend and backend development. Certified **OutSystems Associate Developer** with expertise in **low-code application development**.

📁 PROJECTS

Vidyut - AI-Powered Maintenance Guide for Power Stations (Smart India Hackathon)

React / Node.js / Python / Machine Learning (custom dataset training) / BotPress

Finalist project at **Smart India Hackathon** under the Ministry of Power. Built an AI chatbot trained on ministry-provided data to assist with power station maintenance procedures and equipment queries.

Attendo - Face Detection Attendance System 🌐

MERN (MongoDB / Express / React / Node.js) / HTML / CSS / JavaScript / MongoDB Atlas

Web-based facial recognition system for accurate, real-time attendance tracking. Built with Node.js and MongoDB; generates detailed performance reports. **Won 1st place** in an internal hackathon for its precision and efficiency.

🎓 EDUCATION

Bachelor of Technology - Computer science

2024 | Indore, India

Indore Institute of Science and technology 🌐

📄 CERTIFICATES

Associate Reactive Developer — OutSystems 11 | **Full-Stack Web Development** — Udemy

🧠 SKILLS

Programming languages — Java / C / C++ / JavaScript (ES6) / TypeScript / Python

Web & App Development: — React / React Native / Native Android / Android TV / Redux / Next.js / Vite / Material UI / Tailwind CSS / Sass / HTML / CSS / EJS / JSX / jQuery

Backend & APIs — Node.js / Express / FastAPI / WebSockets / Firebase / Cloudflare

Database & Storage — MongoDB (Mongo Atlas) / MySQL / PostgreSQL / ChromaDB / Firestore
